ATHARV CHAUDHARI

Data Scientist | Machine Learning Practitioner
GitHub: github.com/Atharvchaudhari1106 | Portfolio: my-movie-ratings

---

PROFESSIONAL SUMMARY

Data Science professional with rigorous expertise in Python, SQL, statistical modeling, and machine learning pipelines. Demonstrated ability to formulate production-grade analytical frameworks, engineer high-impact features, and deploy reproducible models.

CORE COMPETENCIES & TECHNICAL SKILLS

- Programming & Querying: Python (Pandas, NumPy, SciPy, Scikit-Learn, Matplotlib, Seaborn), SQL, REST APIs
- Machine Learning & Statistics: Bayesian Weighted Shrinkage, Hypothesis Testing, XGBoost, Quantile Regression
- Developer Tooling & DevOps: Git, GitHub Pages, Git LFS, nbdime, Linux/PowerShell, CI/CD Workflows

FEATURED DATA SCIENCE PROJECTS

1. Movie Ratings Intelligence & Bayesian Recommender (my-movie-ratings)

- Applied Bayesian shrinkage to correct small-sample variance in IMDb movie scores, normalizing ratings via vote confidence intervals.
- Built reproducible notebook pipelines with nbdime version control and automated GitHub Pages portfolio deployment.

2. Zomato Restaurant Ratings & Delivery Optimization Engine

- Engineered spatial-temporal rush features and quantile regression models predicting 85th-percentile kitchen preparation times.
- Minimized rider idle wait times and reduced peak-hour cart abandonment through context-aware meal bundling.

3. Instagram Reach Analytics & Content Conversion Pipeline (insta-analytics)

- Designed an end-to-end Data Analytics project architecture with strict raw/processed data segregation and targeted .gitignore hygiene.
- Modeled video dwell times, engagement ratios, and demographic reach across Reels and static posts.

EDUCATION & CERTIFICATIONS

Bachelor of Technology / Data Science Track

Comprehensive coursework in Applied Statistics, Linear Algebra, Machine Learning, and Data Engineering.
